Speed - max (kn)	6
Fuel tank (l)	800
Layout	Open plan, removable wheel house
Crew (pax)	2

Sturdy work horse

This work horse comes into its own in towing, pushing and as a project support. The strong hull, large fendering and good bollard pull make this tug a great help at your projects. Hull shape, hydraulic steering and large rudder area serve a comfortable ride and controlled maneuvers.

Practical for every job

Her size and open plan lay-out make for great access to the water and to other craft for towing or pushing. The half open wheel house gives good weather protection and maximum overview of all jobs. Easy to operate for your crews, good sailing behavior and a mighty bollard pull – all you need in a small tug.

Great geographical scope

This boat has the exact size of 1TEU and can be deployed just about anywhere around the world. The compact size and shallow draft make this vessel easily hoistable and transportable on a truck, which means fast deployment even at the remotest of locations.

Get power, save money

- » Strong tow and push boat.
- » Bollard pull up to 1.5 tons.
- » Compact size, easy operating.
- » Easy transport as 1 TEU.
- » BV or Lloyds class optional.
